

PRAVEEN PANDARINATHAN

ML / AI Engineer | MLOps | Cloud Infrastructure | Python & AWS

Open to Relocation | Available from September 2026

Chennai, India, praveenpandinathan@gmail.com, +91 9360010977, [linkedin.com/in/praveen-pandinathan-0382b8200](https://www.linkedin.com/in/praveen-pandinathan-0382b8200), [github](#)

Master's student in Data Analytics with a strong foundation in data analytics, machine learning, and artificial intelligence. Experienced in Python, SQL, data visualization, and cloud technologies, with hands-on projects involving predictive modeling, dashboard development, and business analytics. Adept at translating complex data into actionable insights and supporting data-driven decision-making. Eager to apply analytical, technical, and problem-solving skills in AI, ML, and data-focused roles.

PROFESSIONAL EXPERIENCE

Assistant Engineer - Data Analytics | Reude Technologies, India Dec 2023 – Mar 2025

- Developed Python and SQL-based data pipelines for drone and IoT sensor data, automating data ingestion, processing, and reporting workflows, reducing manual effort by 70%.
- Built and maintained ETL solutions on AWS (Lambda, S3, RDS) to support real-time monitoring, fleet performance tracking, and operational analytics.
- Collaborated with engineering and business teams to analyze drone operation data, generate actionable insights, and improve reporting efficiency and decision-making.
- Supported cloud infrastructure automation and deployment using Terraform and Infrastructure-as-Code (IaC) practices, enhancing system reliability and scalability.

Data Scientist - Hackathon | Vaccine Yield Project, GSK, Belgium Jan 2026 – May 2026

- Built end-to-end data preprocessing and feature engineering pipelines integrating SAP, event-log, and sensor data (~2,800+ engineered features) for pharmaceutical manufacturing analytics
- Developed KPI analysis and batch-level yield prediction models using Python and statistical techniques on large-scale production datasets
- Presented data-driven findings and recommendations to stakeholders, translating complex analytical results into clear business insights

TECHNICAL SKILLS

- Programming & Analytics:** Python, SQL, PySpark, Linux, Statistical Analysis, Exploratory Data Analysis (EDA)
- Data & AI:** Data Quality Validation, Predictive Modeling, Feature Engineering, AI Analytics, KPI Analysis, Machine Learning, Generative AI
- Visualization & Reporting:** Tableau, Dashboard Development, Business Analytics
- Libraries & Tools:** Pandas, NumPy, Scikit-learn, Apache Spark, MLflow, Git
- Cloud & Platforms:** AWS (Lambda, S3, RDS, EC2, CloudWatch), Databricks
- MLOps & Deployment:** Docker, Kubernetes, SageMaker, Model versioning, A/B deployment
- Databases:** MySQL, PostgreSQL, DynamoDB, RDS

EDUCATION

Master in AI and Data Analytics | IESEG School of Management, Lille, France Aug 2025 – Aug 2026

- Coursework: Data Engineering, Big Data Analytics, Cloud Computing, Machine Learning, Statistics, Data Visualisation .
Projects: **ETL pipelines, KPI dashboards, predictive modelling, analytics engineering**

Bachelor of Engineering — Aeronautical Engineering | Hindustan University, India Jun 2019 – May 2023

CERTIFICATION

- AWS Certified **Machine Learning** Engineer Associate (MLA-C01) [🔗](#)
- AWS Certified **Solutions Architect** Associate (SAA-C03) [🔗](#)
- HashiCorp Certified **Terraform** Associate (TA-004) [🔗](#)
- Databricks Certified Associate Developer for **Apache Spark** [🔗](#)
- Salesforce Certified **Tableau** Desktop Foundations (TDS-C01) [🔗](#)

PROJECTS

End-to-End MLOps Pipeline – Diabetes Prediction [🔗](#) | FastAPI · Docker · Kubernetes · MLflow · GitHub Actions

- Designed complete MLOps workflow: model training → FastAPI REST API → Docker containerisation → Kubernetes deployment with multi-replica setup, LoadBalancer, and auto-scaling .

LANGUAGES

- English - Professional, Tamil - Native, French - A2
